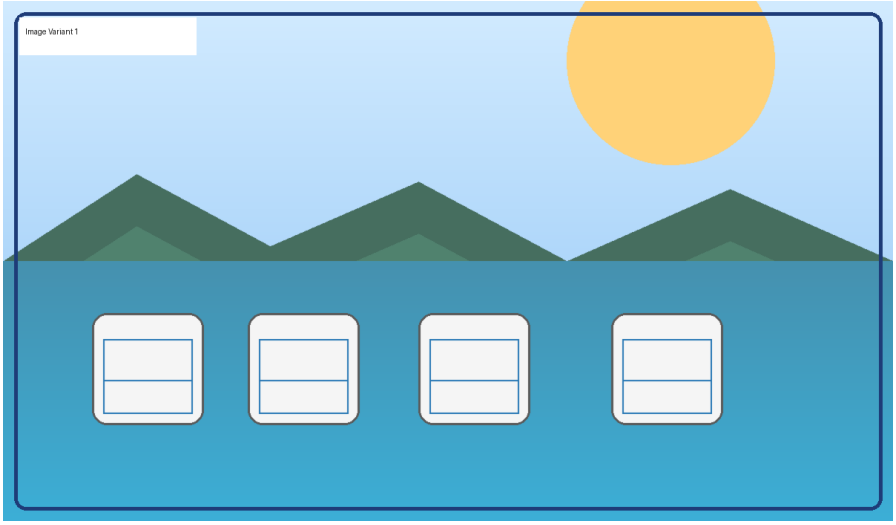
Pagination Stress Test: Many Images + Very Long Text (Fixed Scaling)

This revised version preserves image aspect ratio. It is designed to verify that image-heavy and text-heavy content continues onto new pages without clipping, overlap, distortion, or rendering regressions.

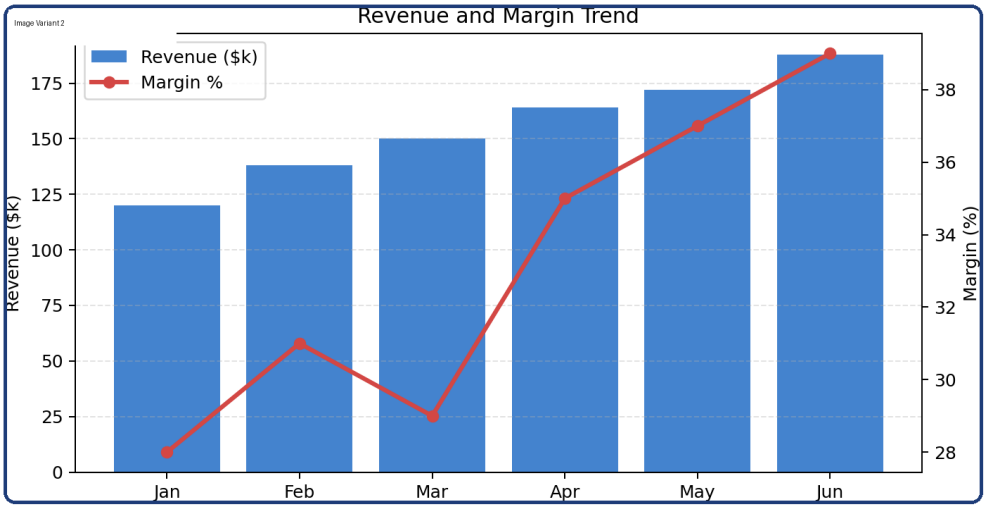
Section 1 — Many Images Overflow Test

Image block 1



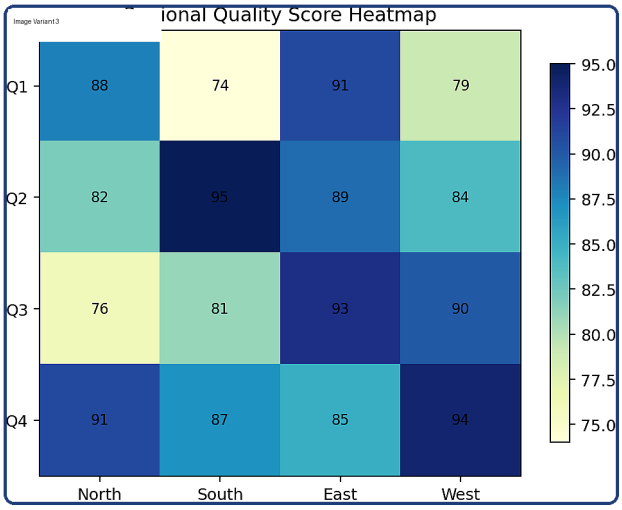
This image keeps its original aspect ratio (1200×700 px source, displayed at 333×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 2



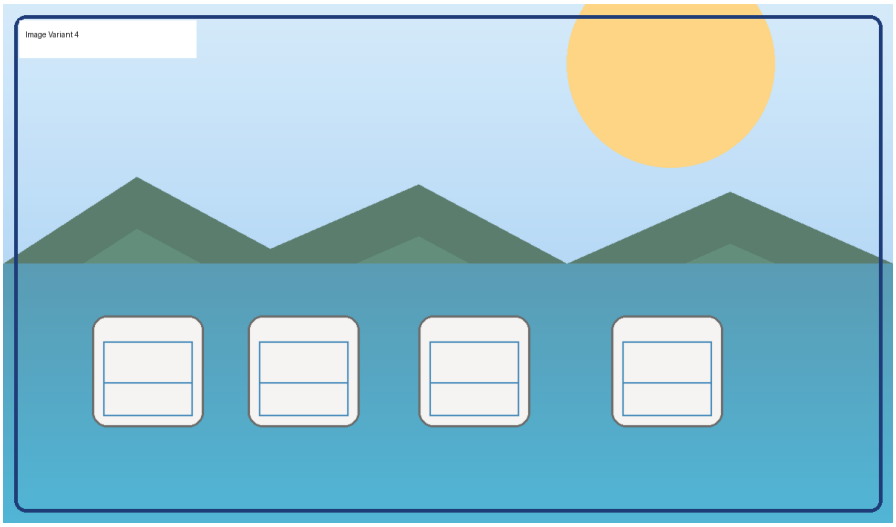
This image keeps its original aspect ratio (1422×738 px source, displayed at 375×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 3



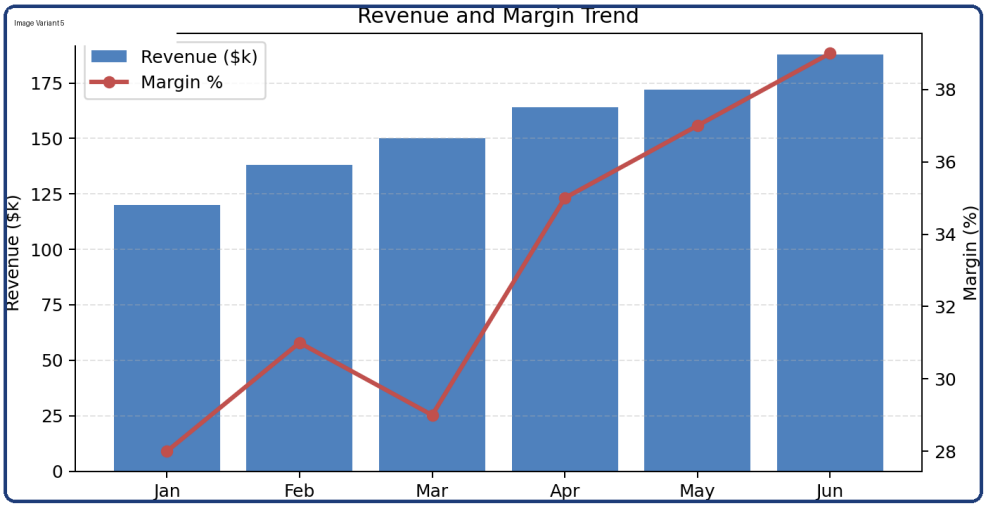
This image keeps its original aspect ratio (988×809 px source, displayed at 237×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 4



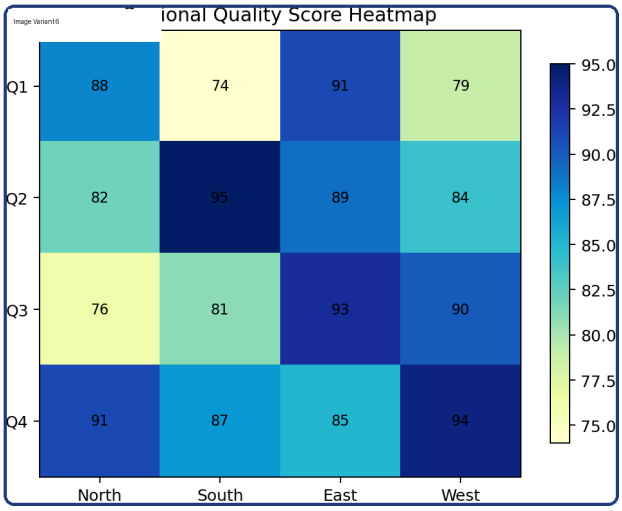
This image keeps its original aspect ratio (1200×700 px source, displayed at 333×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 5



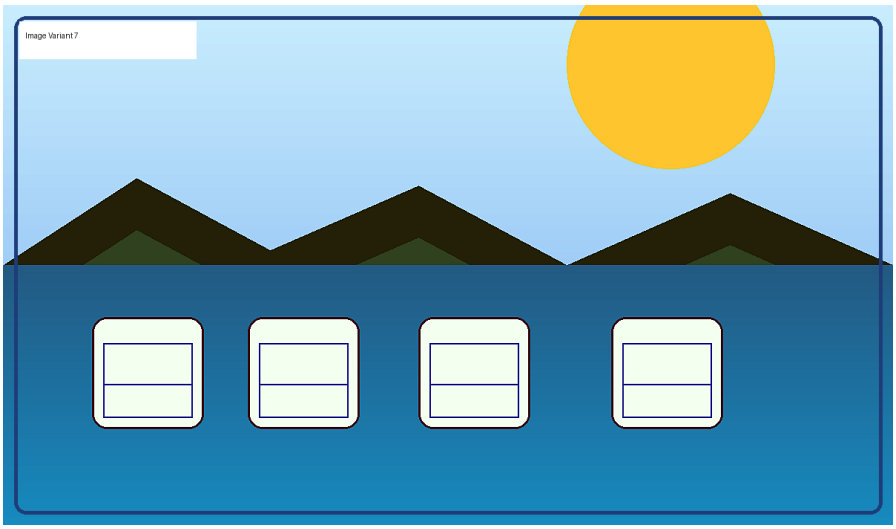
This image keeps its original aspect ratio (1422×738 px source, displayed at 375×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 6



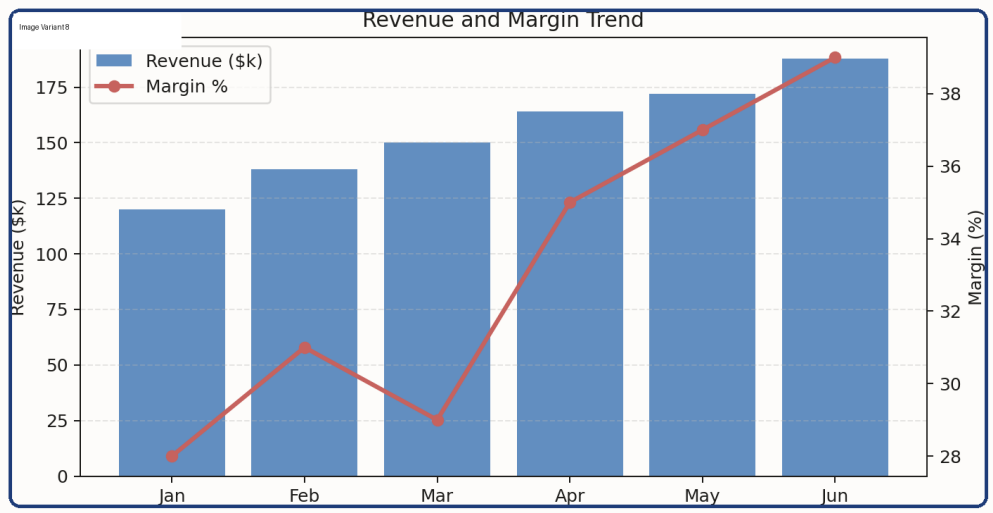
This image keeps its original aspect ratio (988×809 px source, displayed at 237×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 7



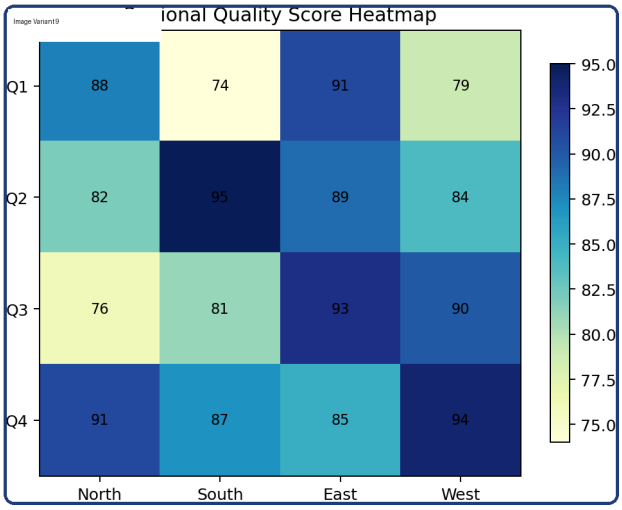
This image keeps its original aspect ratio (1200×700 px source, displayed at 333×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 8



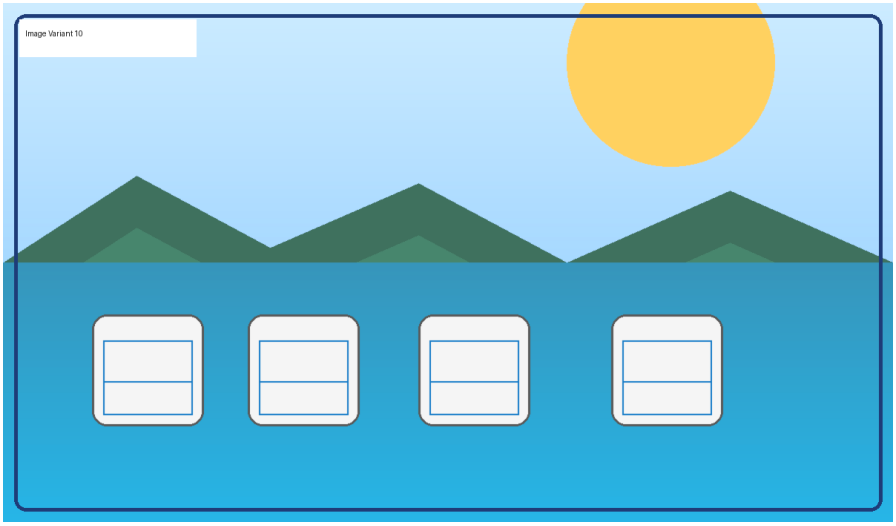
This image keeps its original aspect ratio (1422×738 px source, displayed at 375×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 9



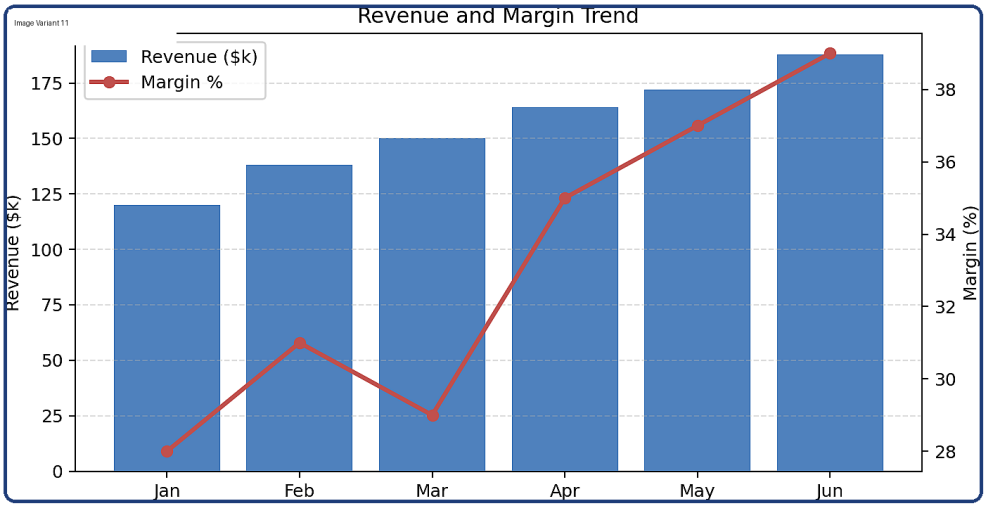
This image keeps its original aspect ratio (988×809 px source, displayed at 237×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 10



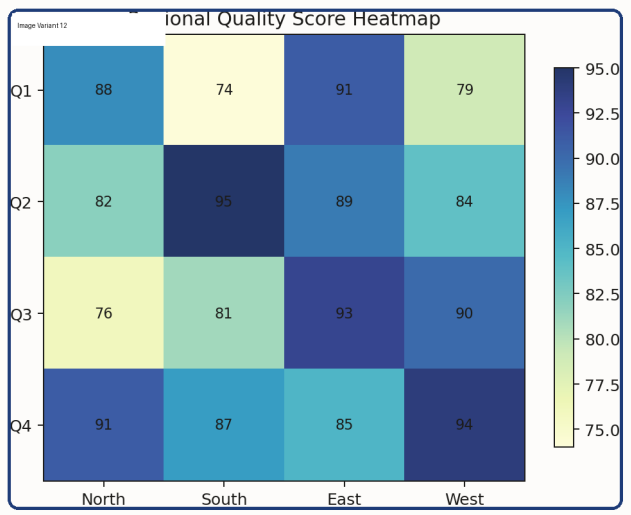
This image keeps its original aspect ratio (1200×700 px source, displayed at 333×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 11



This image keeps its original aspect ratio (1422×738 px source, displayed at 375×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Image block 12



This image keeps its original aspect ratio (988×809 px source, displayed at 237×194 pt). The block intentionally contributes to pagination overflow so we can verify clean continuation onto later pages without distortion.

Section 2 — Very Long Text Overflow Test

Paragraph 1. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 2. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 3. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 4. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 5. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to

verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 6. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 7. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 8. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 9. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 10. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic

enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 11. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 12. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 13. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 14. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 15. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally

repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 16. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 17. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 18. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 19. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 20. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps

paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 21. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 22. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 23. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 24. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 25. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a

dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 26. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 27. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 28. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 29. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 30. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page

breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 31. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 32. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 33. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 34. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 35. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster

rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 36. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 37. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 38. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 39. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 40. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 41. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 42. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 43. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 44. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Paragraph 45. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility. Operations leaders requested a dedicated pagination stress test to verify that long narrative content flows cleanly across page boundaries, keeps paragraph spacing consistent, and preserves text sharpness after PDF raster rendering. This paragraph is intentionally repetitive and moderately long so that dozens of copies will force multiple page breaks while still remaining realistic enough to judge spacing, leading, and text legibility.

Expected behavior: images should retain correct proportions while flowing onto additional pages, and long text should continue across later pages with no truncation, clipping, or margin violations.
